NOTE XXV.

SYNONYMICAL REMARKS ON CETONIIDAE

BY

J. R. H. NEERVOORT van de POLL.

1. *Lomaptera marginata* Kraatz (Deutsche Ent. Zeitschrift, 1890, p. 31) = *Lomaptera Duboulayi* Thoms. (Bull. Soc. Ent. de France. (5) VIII, 1878, p. cxxxviii; Aid to the Identification of Insects, plate 144, fig. 3).
2. *Cirrhospila flavo-maculata* Kraatz (l. c. p. 279, taf. II, fig. 14) = *Gnorimidia Toyae* Lansb. (Notes from the Leyden Mus. IX (1887), pp. 168 and 169).

NB. This insect is authentically recorded from the »Kodeicanel Mountains" near Madras, the locality »Java" given by Kraatz for it, will be just as erroneous as it is for *Melinospila (Macronota) flavo-maculata* G. & P., a species from Pondicherry, which Mr. Nonfried should have received, together with *G. Toyae*, from Java.

Amsterdam, July 1891.
